Thank you for giving us an opportunity to build new skills for future purpose.

Thank you for giving us an opportunity where we learn freely and explore interesting topics. My personal experience is wonderful and also help me as a career guidance.

Also I want to thank Mr. Tapan sir for creating such a positive environment that makes us to interact and learn in an interesting manner. Step by Step we have done practical regarding many topics which are so informative and useful.

Basically for me this workshop is very beneficial and I have learned many things that helps me in my career.

Thank You!!

I am able to learn more than I expected 😊.

I really enjoyed learning this thread days course. I had no idea about ethical hacking but at the end of this three days course I am now able to report bugs, I have an idea about cross site scripting ,i am able to report sites, improper excess control. I am glad that we got a mentor like Sir Tapan Kumar Jha who made this workshop a fully interactive one

I attended the Workshop for Cyber Security

I attended the Workshop for CyberSecurity and Ethical Hacking... Tapan Kumar Jha Sir is very talented, ethical and very interactive. Got to know the surface level basics of how the cyber security works...And MakeSkill is doing a good job connecting the experts to the student who have just entered the engineering. Please continue to organise these type of sessions for various diverse fields... This gives the base and necessary skills and maturity of decision making to our students of India. Jai Hind!

Brilliant experience

This experience was brilliant overall. It was a wonderful time spent, and I got to learn a lot of new things. The workshop was worth taking for beginners as well who have no prior knowledge. Mr. Tapan Kumar Jha sir was extremely patient and skilled, who taught us all the details and cleared all our small doubts as well. Happy to have explored this field with such a highly qualified teacher. Will definitely recommend this to everyone in future.
